

Herring Gull

[<http://www.aves.be/>]

05920 - Herring Gull - Larus argentatus.

Coordinator of the large gulls cr-projects is :

Peter Rock, 7 Parkside Avenue, Winterbourne, Bristol BS36 1LU , United Kingdom.

e-mail: pete.rock@blueyonder.co.uk

-

Colour and type of rings on legs :

black	pale-blue	orange	white	dyed	combination
dark-blue	green	red	yellow	single	wingtags
grey					

Grey ring with red code (two letters separated by a "+" sign).

Peter Rock, 7 Parkside Avenue, Winterbourne, Bristol BS36 1LU , United Kingdom.

e-mail: pete.rock@blueyonder.co.uk

note 1 : codes can be : A+A ; A+B ; A+C ; ...

White ring with black code [R:letter-number-letter] (on left tarsus).

Julien Gernigon, Réserve Naturelle de Lilleau des Niges, Route du vieux port, FR- 17880 Les portes en Ré, France.
 tél : 05.46.29.50.74
 mobile : 06.98.92.84.02
 e-mail : julien.gernigon@lpo.fr

note 1 : do please pay attention to the colon "R:" as this is very important.

note 2 : the birds are ringed on the Nature Reserve of Lilleau Niges, Re Island, Charente Maritime department, France.

White ring (on right leg) with black code (letter M and 3 numbers + Q in the end) and metal ring (on left leg).

Swedish Museum of Natural History Bird Ringing Centre Box 50 007, 104 05 Stockholm, Sweden.

e-mail : bird.ringing@nrm.se

note 1: used codes are M001Q-M199Q.

note 2: birds are ringed near Stora Karlsö, SW Gotland, Baltic Sea, Sweden.

White ring with 5 black letters/numbers (on right leg) -starting with M- and metal ring (on left leg).

Måns Hjernquist, Spronge Snoder, S-620 20 Klintehamn, Sweden.

e-mail: mans.marlo@telia.com

note 1 : birds are ringed at Lilla Karlsö, Gotland, Sweden.

White ring (on right leg) with 4 alphanumeric code (starting with A2** followed by a combination of letters).

Richard Thompson, Wildlife Officer, RSPCA Mallydams Wood, Peter James Lane, Fairlight, East Sussex, TN35 4AH.

tel.: +44-1424-81.20.55.

e-mail: richardthompson729@btinternet.com

note 1: the metal BTO is fitted on the left leg.

note 2 : used codes are A1AA - A1ZZ black characters on white, A2AA - A2ZZ black characters on white, A3AA - A3ZZ black characters on white, A4AA - A4ZZ black characters on white, A5AA - A5ZZ red characters on white, A6AA - A6zz black characters on white, A7AA - A7ZZ black characters on white.

note 3 : codes will be used till A9**. The wild gull chicks have been ringed on roof nests along the south coast.

White ring with black code KJnnx (where n is a number and x a letter).

Risto Juvaste, Viljakaari 4, FIN-80510 Onttola, Finland.

tel.: +358-13-801.293.

gsm : +358-50-36.76.167.

e-mail : " rr <ADD> juvaste <DOT> fi "

website : www.juvaste.fi

note 1: 50 birds ringed in Russian Karelia during 2001. No metal ring.

White ring with black code Knnn or Kxnn and Knnx (where n is a number and x a letter (no KJnn).

Bird Ringing Centre, Leninsky prospect 86-310, Moscow 119313, Russia.

tel.:+7-095-138-22.31. fax: +7-095-423.26.13.

e-mail : bird.ring.rus@gmail.com

note 1: almost 2000 birds ringed mostly on the White Sea.

note 2: KJxxx and KJxxx see another project from Risto Juvaste.

White ring with black code KJxx or KRxx (where x is a number or a letter).

Risto Juvaste, Viljakaari 4, FIN-80510 Onttola, Finland.

tel.: +358-13-801.293.

gsm : +358-50-36.76.167.

e-mail : " rr <ADD> juvaste <DOT> fi "

website : www.juvaste.fi

note 1 : 350 ringed in Russian Karelia during 2002-2007 ; some without metal ring.

note 2: recent years there can exist small check marks in the code (spots, underlines), please, inform them also.

White ring with black code Cxxx (where x is a number or letter).

Ringing Centre, Finnish Museum of Natural History, Zoological Museum, P.O. Box 17, University of Helsinki, FIN-00014 Helsinki, Finland.

tel.: +358-9-191.28.847 or +358-9-191-28.848.

e-mail : elmu_ren@cc.helsinki.fi

website : <http://www.fmnh.helsinki.fi/birding>.

note 1: 10000 white rings were delivered 1993-2003.

note 2: many rings have also small text MUS FINLAND or MUS Z FINLAND.

note 3: recent years there can exist small check marks in the code (spots, underlines), please, inform them also.

note 4: The LBBGull c-ringing-project has been very successful. In ten years we have got almost 70000 reads from 4000 individuals. Now about 8000 reads/1000 individuals are made yearly. Before read ringing there were only 2000 found (about 50 ones/year) from 50.000 metal ringed LBbGs. The population of nominate LBBG (*L. fuscus fuscus*) has been strongly decreasing in

Finland. It crashed to half of the one of the 1970's and the bird was taken to the Red Book of Finnish Birds.

White ring (on right leg) with code (3 blue alphanumeric code) and metal ring (on left leg). [1]

White ring with code n.xxn (where n = number and x = letter - with the dot as the check character). [2]

[1] :

Jamie Hooper, 1 Trinity Cottages, Rue du Portelet, Torteval, Guernsey GY8 0QD.

e-mail: jamie.hooper@cwgsy.net

tel.: (01481)26.69.24. ; mobile : (07781)16.69.24.

note 1: the project runs on Guernsey-island.

Paul K. Veron, Ty Coed, Rue du Closel, Vale, Guernsey, via United Kingdom, GY3 5ES.

e-mail : pkv@cwgsy.net

website : www.paulveron.com (and click on Guernsey Gulls) or <http://www.guernseygulls.blogspot.com/>

note 1 : birds are ringed in the Bailiwick of Guernsey. This is a successor to the project run by Jamie Hooper from 1998 – 2007 (see below).

note 2 : The position of the dot is important.

note 3 : the '2009 Guernsey Gulls Report' is available on the Guernsey Gulls web site (www.guernseygulls.co.uk) and also on the Guernsey Gulls Blogspot (www.guernseygulls.blogspot.com).

The report can also be viewed by clicking direct on the link below:

<http://www.paulveron.com/2009%20Annual%20report%20version%201.html>

Black c-ring with a yellow 4 alpha-numeric code (on left leg) and BTO-metal ring (on right leg).

Kevin Scott, Manx Ringing Group, c/o Manx BirdLife, 35 New Road, Laxey, Isle of Man, IM4 7BG, British Isles, UK.

e-mail: kev@wm.im

website: www.manxringer.blogspot.com

note 1 : last position uses each letter of the alphabet and * = number 0-9.

note 2 : used codes are T*TR through to T*TZ ; T*UA through to T*UZ ; T*VA through to T*VZ ; T*WA through to T*WZ ; T*XA through to T*XZ ; T*YA through to T*YZ ; T*ZA through to T*ZZ.

note 4 : birds are ringed on the Isle of Man, British Isles.

note 5 : this blog contains a link to a document giving the details of the scheme above.

<http://manxringer.blogspot.com/2010/07/colour-ringing-schemes-used-by-manx.html>

Combination of two c-rings [(black with a 2 digit/alphanumeric code) and white (with letter "A")] and a metal ring.

Jean-Pierre Leys, 55 rue Dufour, FR-59270 Bailleul, France.

e-mail: jean-pierre.leys@wanadoo.fr

note 1: used colours are black (below) and white (above). Reading upwards.

note 2: flying birds carry a black ring with 2 alphanumeric code and a white ring with the letter A on right tarsus. Metal ring is on the left tibia.

note 3: pulli carry a black ring with 2 alphanumeric code and a white ring with the letter A on left tarsus. Metal ring is on the right tibia.

note 4 : letters not used : B, D, G, I, O, Q.

Black ring with white code (letter J and 3 or 4 numbers and/or letters).

direct report : www.ringmerking.no

The purpose of this page is to make it easy for observers to report information on colour-ringed birds. After registering as a user, you can report the colour code you have seen and immediately receive data on where the bird has been ringed and observed before.

Project leader : Lista Ringing Group, Boks 171, 4558 Vanse, Norway.

e-mail: clifu@c2i.net

note 1 : birds are ringed in South-Norway.

Black (plastic) ring with white code (on tarsus).

website : <http://www.gowerbirdhospital.org.uk>

note 1: metal BTO ring on right leg.

note 2: a project on Herring and Lesser Black-backed Gulls that have been treated for botulism.

note 3: an average of 35 birds per year is estimated, but during 2000 some 64 birds were released.

note 4: a good scheme descriptor for the Rehabilitation Centre: Gower Bird Hospital, Valetta, Sandy Lane, Pennard, Swansea, SA3 2EW.tel: 01792 371630 fax: 01792 371412 ; e-mail: simon@gowerbirdhospital.org.uk ; website: www.gowerbirdhospital.org.uk.

Type of Scheme: Colour ringing of rehabilitated Herring and Lesser Black Backed Gulls that have been treated for botulism.

Number of Birds: Approx 35 birds per year. Scheme Length: On going (we have 5 years worth of rings but intend to ring indefinitely, as long as the funds are available). Ring Description: Dark Blue with white letter Y. fitted to the left leg and metal BTO ring fitted to the right leg. Observer Contact: Simon Allen, Gower Bird Hospital, Valetta, Sandy Lane, Pennard, Swansea, SA3 2EW. tel: 01792 371630 ; international: +44 1792 371 630 ; e-mail: gulls@gowerbirdhospital.org.uk

Blue ring (on left leg) with white code (number, followed by 2 letters, beginning 0AC). BTO metal ring on right leg.

Chris Honan, 16 The Priory, Westcourt, Drogheda, Ireland.

e-mail: gulls@eircom.net

website: www.gulls.ie (Site will be available in September 2009.)

note 1 : blue ring (on left leg) with white vertical code (number, followed by 2 letters, beginning 0AC). BTO metal ring on right leg.

note 2 : first birds of study were ringed as pulli on east coast of Ireland during Summer 2009.

Blue ring with two yellow letters (on right leg) and metal ring (on left leg).

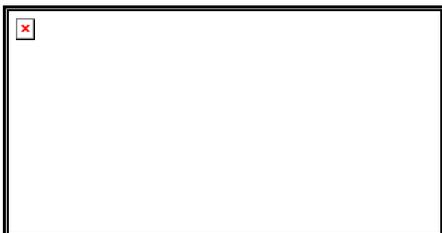

e-mail : pete.rock@blueyonder.co.uk

Blue ring with white code (V.001 - V.452)

Kjeld Tommy Pedersen, Zoological Museum, Copenhagen, Denmark.

e-mail : ktpedersen@snm.ku.dk

note 1 : only a few birds are ringed in Denmark.

Dark-blue ring with white site code AAA on right leg.

Richard Thompson, Wildlife Officer, RSPCA Mallydams Wood, Peter James Lane, Fairlight, East Sussex, TN35 4AH.

tel.: +44-1424-81.20.55.

e-mail: richardthompson729@btinternet.com

note 1: some 200 birds are ringed in the framework of a wildlife rehabilitation centre near Hastings, East Sussex.

Dark-blue ring with white code ((letter J and 3 letters or 3 numbers or 3 letters and numbers).

direct report : <http://www.ringmerking.no/cr/>

The purpose of this page is to make it easy for observers to report information on colour-ringed birds. After registering as a user, you can report the colour code you have seen and immediately receive data on where the bird has been ringed and observed before.

Project leader : Lista Ringing Group, Boks 171, 4558 Vanse, Norway.

e-mail: clifu@c2i.net

note 1: used codes for the pale-blue rings are: J601-J700.

note 2: used letters for the dark-blue rings are: A, C, G, E, H, J, K, L, M, N, P, R, S, T, U, V, X, Y, Z.

Blue ring with code (3 orange numbers).

Blue rings with code (3 orange letters).

Blue rings with code (3 yellow letters).

Peter Stewart, 10 Digby Road, Evesham, Worcs., WR11 1BW.

e-mail : peter.stewart2@talktalk.net

Blue ring with white code (4 letters: AAAA up to PZAZ) and often a metal ring. Sometimes a white dot is placed somewhere in between the letters. If possible, please note the position of this dot as well as the direction in which the ring was read (up/down).

Eric Stienen, Research Institute for Nature and Forest, Kliniekstraat 25, B-1070 Brussels, Belgium.

tel. : +32-2-558.18.28.

fax.: +32-2-558.18.05.

e-mail: eric.stienen@inbo.be

note 1: used codes are: AAAA up to PZAZ. For example: AGAT, F.YAK or KA.AD.

note 2: the letters E, I, O and Q have not been used.

note 3: on the ring the code is printed 3 times and must in most cases be read upwards. Preferably blue rings were placed at the right tarsus and metal at the left, but there are exceptions.

note 4: a few Herring Gull look-alikes with yellowish legs (hybrids as well as pure Yellow-legged Gulls) were cr-ringed as well.

Special notice :

During autumn 2006 a 1K. Herring Gull has been brought into the revalidation centre of Oostende, Belgium where it was fitted with a light-green ring coded 429 [and also 49] (as a part of c-ring incoming gulls). The bird escaped and flies around with this ring. See [this picture](#) (courtesy Roland Francois).

See also : <http://www.vogelopvangcentrum.be/oostende/>

Green ring with white letter-code (on tibia).

Christopher Perrins,

e-mail : chris.perrins@zoo.ox.ac.uk

note 1 : all rings are of the same design, with the letter repeated three times round the ring, so that the ring "AB" when flat with look like AAA, BBB, ...

note 2: birds are ringed on Skomer Island, Wales.

note 3 : in earlier years, were used the letters up to NZ in white with black lettering and this year's will be OA-OZ, green rings with white lettering. We only use 20 letters ABCDFHIJKLMNOPSTUVXYZ, since the others are too large (W&M) or too like other letters (EGQR).

Green ring with white code (starting with AZ).

Jörg Hadasch, Bäderstrasse 8, D-32602 Vlotho, Germany.

e-mail : joerg.hadasch@gmx.de

note 1: used code is : AZ01-AZ20.

Green ring with white code (4 characters) on right or left tarsus.

Kees Camphuysen, Koninklijk NIOZ, Postbus 59, NL-1790 AB Den Burg, Texel, The Netherlands.

e-mail : kees.camphuysen@nioz.nl

website : <http://home.planet.nl/~camphuys/kleurringen.htm>

note 1 : adult and juvenile birds are ringed at Texel (since 2006), Leiden (only in 2007), Vlieland (since 2007), and IJmuiden (since 2008).

Texel adults will be ringed with starting-letter "M" or "F" followed by a "dot" and 3 characters. [e.g. M.AAA] . M stands for male, F stands for female. Chicks are ringed on Texel with starting letter "P" followed by a "dot" and 3 characters. [P.AAA] – Steel ring on tibia

Leiden birds are roof-nesting individuals and these will be ringed with starting-letter "K" followed by a "dot" and 3 characters. [e.g. K.LAK]

IJmuiden birds will be ringed by with starting-letter "Y" followed by a "dot" and 3 characters. [e.g. Y.AAA] (irrespective of sex and age). – Steel ring on tarsus

Some **Vlieland birds** banded in 2007 and 2008 carry a PTT with a harness (http://www.microwavetelemetry.com/Bird_PTTs/12g_specs.php) :

F.AAA, F.AAB, F.AFB, F.AFF, F.AFH, F.AFJ, F.AFM, M.AFF, M.AFH, M.AFJ, M.AFL, M.ALA

note 2 : Ringing site is Kelderhuispolder, Texel, The Netherlands.

note 3 : metal ring on right tibia, colour ring on left tarsus

note 5 : rings should read upwards (some errors were made), the inscription is read three times.

note 6 : the letters used are A B C D F G H J K L M N P R S T U V W X Y Z

note 7 : As material PMMA is used and details on how these rings hold (colour, inscription, general wear) and e.v damage to the gulls is most welcome.

note 8 : although these are in fact 2 ringing schemes, the records can be sent to the single address above (Kees Camphuysen) for immediate processing, to avoid a further increase in HG programmes...

Any sightings please do report the condition of the bird, the type of area or terrain the bird is in (is it feeding??) and any (digital) images would be greatly appreciated.

note 9 : The **M.xxx** and **F.xxx** series for mature LBBGs and HGs is continued ; The **P.xxx** series is now exclusively used for fledglings HGs (that do not travel far south) because of an unfortunate overlap with a Spanish scheme in 2006.

note 10: Birds from all the above ringing programmes should be reported to Kees Camphuysen to swiftly obtain a life-history.

Green ring with white 4 alphanumeric code (first letter always A) on right leg.

Nele Markones, Forschungs- und Technologiezentrum Westküste (FTZ), Universität Kiel, Hafentorn, D-25761 Busum, Germany.

tel.: +49-(0)48.34.604.122.

fax: +49-(0)-48.34.604.199.

e-mail: markones@ftz-west.uni-kiel.de or Nele.Markones@gmx.net

note 1 : used codes from 2001-2006 were :

ACA*, ACC*, ACE*, ACF*, ACG*, ACH*, ACJ*,
 ACK*, ACL*, ACM*, ACN*, ACP*, ACR*, ACS*, ACT*, ACU*, ACV*, ACX*, ACY*,
 AEA*, AEC*, AEE*, AEF*, AEG*, AEH*, AEJ*, AEK*, AEL*, AEM*, AEN*, AEP*,
 AER*, AES*, AET*, AEU*, AEV*, AEX*, AFA*, AFC*, AFG*, AFH*, AFJ*, AFK*,
 AFL*, AFM*, AFN*, AFP*, AFR*, AFS*, AFT*, AFU*, AFV*, AFX*, AGA*, AGC*,
 AGE*, AGF*, AHA*, AHC*, AHH*, AHJ*, AHK*, AHL*, AHM*, AHN*, AHP*, AHR*,
 AHS*, AHT*, AHU*, AHX*, AJL*, AJM*, AJN*

note 2 : the "*" in the code means a number : 0,1,2,3,4,5,6,7,8,9,0.

note 3 : birds are ringed as non-fledged chicks in a colony of about 300 breeding birds near the city of Kiel.

Pale-green ring with white code (on left leg) and metal ring (on right leg).

David Sowter, 5 The Grove, Penwortham, Preston PR1 UU, UK.

e-mail: davidsowter@freenet.co.uk

tel.: +44-(0)17.72-749.220.

note 1: [more information](#) on this project.

note 2: these rings were used for 200 birds at each of the following colonies in 1997 only. R = Ribble Estuary National Nature reserve (53°42'N/02°55'W) ; T = Tarnbrook Fell colony (54°01'N/02°35'W) ; W = South Walney Nature reserve (54°03'N/03°12'W).

Green ring with white horizontal code KJnn (where n is number).

Risto Juvaste, Viljakaari 4, FIN-80510 Onttola, Finland.

Green ring with white code.

Birds are ringed by several people, in cooperation with Ornithological Station, Museum and Institute of Zoology, Polish Academy of Sciences, Nadwislanska 108, 80-680 Gdansk, Poland.

tel.: +48-(0)58-308.07.59.

fax : +48-(0)58-308.09.82.

e-mail: ring@miiz.waw.pl

Please report your sightings to one of the ringers (see table below), Polish Ringing Centre (ring@miiz.waw.pl) or both. See the

table below to find a proper person by code you've read if you need a life history.

If the code is:

5P00-5P99 or 8P50-8P99 – write to Robert Gwiazda (gwiazda@iop.krakow.pl);

3P89-3P99 or 00P0-99P0 – write to Tomasz Iciek (tomici@poczta.onet.pl);

4P00-4P99, 6P00-6P99, 7P00-7P49, 701P-900P, 00P1-99P6 – write to Grzegorz Neubauer (grechuta@miiz.waw.pl);

00P9-99P9 – write to Marcin Sowa (mar_sowa@gmail.com);

All other codes with a single 'P' on any position among numbers – write to Polish Ringing Centre (ring@miiz.waw.pl).

note 1: gulls are ringed since 2000 in central and southern Poland as either breeding adults or chicks,

note 2: species are *L. argentatus* (mainly central Poland), *L. cachinnans*, *L. michahellis* (mainly southern Poland) and hybrids between these three (everywhere). One *L. fuscus* and two hybrids *L. fuscus* x *L. argentatus* have also been ringed,

note 3: there are quite many hybrids, not always possible to identify in the field, so please take a digipho to if possible,

note 4: by writing to Polish Ringing Centre you receive full life-history.

Green ring with white code.

Wlodek Meissner,

e-mail: biowm@julia.univ.gda.pl or biowm@univ.gda.pl

note 1: the metal ring will be put on the left leg and will not be part of the scheme. The two c-darvic rings will be put on the right leg (tarsus) and a red ring will be a site identifier.

note 2: the project is running from 2001 till 2010 in the vicinity of the Gdynia port, Poland.

note 3: used codes are : 0P01 till 0P00. During 2001 the numbers 0P01 till 0P28 have been used.

Combination of rings, eventually with 1 or 2 horizontal lines.

Painted birds (season 2001).

Otto Overdijk, Knuppeldam 4, 9166 NZ Schiermonnikoog, The Netherlands.

tel.: +31-(0)-519-53.13.46.

e-mail: o.overdijk@natuurmonumenten.nl

e-mail: o.overdijk@wxs.nl

note 1: during the summer 2001 some adult birds have been painted with yellow-red-green paint on underwings and belly.

note 2: used colours : black, green, red, white, yellow and blue. The rings are unicolour sometimes with 1 or 2 horizontal lines (1 ring on the tarsus) OR little unicolour rings (2 or 3 on tarsus) or a combination of both.

note 3: the aim of this study is to check the predation from Herring Gull on the tern-colony on Schiermonnikoog, NL now that Herring Gull egg-shaking has been stopped.

Combination of 3 and 4 rings.

P. Monaghan,

e-mail: p.monaghan@bio.gla.ac.uk

note 1: used colours are light-blue, dark-blue, white, brown, grey, yellow, black, orange, red, light-green and dark-green.

Combination of two rings and a metal ring.

Wlodek Meissner,

e-mail: biowm@julia.univ.gda.pl or biowm@univ.gda.pl

note 1: the metal ring will be put on the left leg and will not be part of the scheme. The two c-darvic rings will be put on the right leg (tarsus) and a red ring will be a site identifier.

note 2: the project is running from 2001 till 2010 in the vicinity of the Gdynia port, Poland.

note 3: used colour-codes are : 2001 [yellow over red] ; 2002 [green over red] ; 2003 [blue over red] ; 2004 [black over red] ; 2005 [orange over red] ; 2006 [red over yellow] ; 2007 [red over green] ; 2008 [red over blue] ; 2009 [red over black] ; 2010 [red over orange].

Combination rings (on one leg) with code and metal ring (on the other leg).

Ian Buxton, Le Petit Huquet, La Rue du Huquet,, St. Martin, Jersey JE3 6HU.

note 1: used colours are blue, green, orange and yellow.

Combination of rings without code.

C.R.B.P.O., 55 rue de Buffon, 75005 Paris, France.

note 1: on right leg 1 ring and on left leg: 3 rings.

note 2: used colours are white, blue, yellow, black, orange, red, pale-green, dark-green.

note 3: project runs in Bretagne, France since 1979.

Combination of rings (on left or right tarsus or on left or right tibia) without code.

Camille Duponcheel, La Maladerie 10, 59181 Steenwerck, France.

e-mail: cduponcheel@nordnet.fr

note 1: it is necessary to mark the age of the bird.

note 2: the rings are small, pigeon-type.

note 3: on left or right tibia is a metal Paris-ring.

Combination of 4 rings (incl. alu.ring).

Edward Grey Institute, Dept. of Zoology, South Parks Road, Oxford OX1 3PS, United Kingdom.

note 1: maximum two rings on each tarsus.

Yellow ring with white site code AAA (on right leg).

Yellow ring with black site code AAA (on right leg).

Richard Thompson, Wildlife Officer, RSPCA Mallydams Wood, Peter James Lane, Fairlight, East Sussex, TN35 4AH.

tel.: +44-1424-81.20.55.

e-mail: thompsons@mallydamswood.fsnet.co.uk

note 1: some 200 birds are ringed in the framework of a wildlife rehabilitation centre near Hastings, East Sussex.

note 2: during 2000 yellow was used, other colours in other years.

Yellow ring with a 4 alpha-numeric codes starting with V.

Kjeld Tommy Pedersen, Zoological Museum, Copenhagen, Denmark.

e-mail : ktpedersen@snm.ku.dk

note 1 : used codes are VAAA – VZZZ.

note 2 : project could start in 2011.

- Yellow ring with black 4 letter code starting with "P".

-

Grzegorz Neubauer, PhD., Ornithological Station, Museum and Institute of Zoology PAS, Nadwislanska 108, 80-680 Gdansk, Poland.

e-mail : if the code starts with 'PA' or 'PB' write to ring@miiz.waw.pl (Polish birds); if the code starts with 'PZ' write to grechuta@miiz.waw.pl (Russian birds). In both cases you receive full life-history.

note 1 : used letters are A, B, C, D, E, H, K, L, N, P, S, T, U, V, X, Z (PAAA to PZZZ).

note 2 : first birds were ringed in the 2009 season.

note 3 : rings and code used on Yellow-legged Gull, Caspian and Herring Gulls as well as on their hybrids.

note 4: codes starting with 'PZ' were used in European Russia on Herring and Caspian Gulls and hybrids.

Yellow ring with black code xLyz (where x = digits 2 to 0, y = digits 1 to 0, z = letters).

Lithuanian Bird Ringing Centre, Zoological Museum, Laisves aleja 106, LT-44253 Kaunas, Lithuania.

e-mail: zcentras@takas.lt

tel. : +370-37-205870.

note 1: rings were used on chicks and adults both Herring and Caspian Gulls as well as on their hybrids.

Yellow ring with black code (Hxxx) and (Helgoland) metal ring (on other leg), allways "H" at beginning.

Dr. Sönke Martens, Carl Gördelerweg 16, D-25524 Itzehoe, Germany.

e-mail : S.Martens@KH-Itzehoe.de

note 1 : xxx stands for numbers and letters.

note 2 : examples are H99X, H123, HA67, HX43, H789, H23A.

note 3 : rings are to be read from bottom to top, most rings have a "checkpoint".

note 4 : birds are ringed at Schleswig- Holstein.

note 6 : some rings are used at Lesser Blackbacked Gulls, see this species.

Yellow ring with black code (a few Cnn) Cnnn or Cnnx and Cnxnn or Cnnxx (where n is a number and x a letter.

Ringing Centre, Finnish Museum of Natural History, Zoological Museum, P.O. Box 17, University of Helsinki, FIN-00014 Helsinki, Finland.

tel.: +358-9-191.28.847 or +358-9-191-28.848.

e-mail : elmu_ren@cc.helsinki.fi

website : <http://www.fmnh.helsinki.fi/birding>.

note 1: 2900 rings were used during 1996-1998 and 900 rings with 5 character codes 2006-2007

Yellow ring with black code KJxx or KJxxx (where x is number or letter).

Risto Juvaste, Viljakaari 4, FIN-80510 Onttola, Finland.

tel.: +358-13-801.293.

gsm : +358-50-36.76.167.

e-mail : " rr <ADD> juvaste <DOT> fi "

website : www.juvaste.fi

note 1: 300 birds ringed in Russian Karelia during 2001-2007, most without metal ring.

Yellow ring with black code (mainly on right tibia).

Roland-Jan Buijs, Philips van Dorpstraat 49, NL-4698 RV Oud-Vossemeer, The Netherlands.

tel.: +31-(0)-166-61.73.70.

mobile : +31-(0) 6-18672392

e-mail: rjuijs@hetnet.nl or r.buijs@rocwb.nl

website: <http://www.gull-research.org/>

note 3: rings are 1,8cm. in height and re placed above the knee (on the tibia) for better observation results in the colony (high vegetation) and on rubbish-dumps.

note 4: the position of the metal ring can be left tibia or left tarsus.

Yellow ring with black code.

Eddie Fritze and Kjeld Pedersen, Ringmærkningscentralen, Zoologisk Museum, 15 Universitetsparken, 2100 K benhavn  ., Denmark.

Kjeld T. Pedersen, S nder Boulevard 127 2tv. Kjeld, 1720 K benhavn V., Denmark.

Eddie Fritze, 10, Helmond Alle, 2791 Drag r, Denmark.

e-mail : ktpedersen@snm.ku.dk or ktpedersen@mail.dk

note 1: three alphanumeric code from 1987 till '90 and four alphanumeric code from 1990).

note 2: used code are : V001-V500 ; V501-V605 ; V606-V650 ; V651-V909 ; V910-V925 ; VA01-VA10 ; VE01-VE00 ; VH01-VN00 ; VP01-VZ00, V0AA-V9ZZ.

Yellow ring with black code.

Lars Hansen, lic.nr.288, Ringmærkningscentralen, Zoologisk Museum, 15 Universitetsparken, 2100 K benhavn  ., Denmark.

note 1: used code is: V926-V000 ; VC11-VC50 ; VL01-VL00.

note 2: rings could be used on L. fuscus !

Yellow legring with code.

Ronald Klein, Wiesenweg 20, 23970 Wismar, Deutschland.

note 1: used code is: VC01-VC12.

e-mail : klein_hro@web.de

website : www.greengull.de

Yellow ring with black code Cxxx (where x is a number or letter).

Ringning Centre, Finnish Museum of Natural History, Zoological Museum, P.O. Box 17, University of Helsinki, FIN-00014 Helsinki, Finland.

tel.: +358-9-191.28.847 or +358-9-191-28.848.

e-mail : elmu_ren@cc.helsinki.fi

website : <http://www.fmnh.helsinki.fi/birding>.

note 1: First delivered in 2007.

note 2: There exists small check marks in the code (spots between characters), please, inform them also.

Yellow rings (on left leg) with code (3 alphanumeric code) and metal ring (on right leg).

Mike Freeman, Environmental Services, South Hill, St. Helier, Jersey JE2 4US.

e-mail : M.Freeman@gov.je

fax.: +44-(0)15.34-68.952.

note 1 : the project runs on Jersey-island.

Pale-blue ring (on right leg) with black code "B" with 3 numbers (B000, B001, B002, ...) and metal ring (on left leg).

Christine Blaize, CHENE (Wildlife Rehabilitated Center), 12 rue du Musée FR-76190 Allouville-Bellefosse, France.

e-mail : christine.blaize@wanadoo.fr or asso.chene@wanadoo.fr

note 1 : first, pulli and adults ringed at the rehabilitated centre at Allouville-Bellefosse and the released on the seashore of Normandy. Then pulli are ringed on the roof on the town Le Havre, where they were born.

Pale-blue ring with black code (letter J and 3 letters or 3 numbers or 3 letters and numbers).

direct report : <http://www.ringmerking.no/cr/>

The purpose of this page is to make it easy for observers to report information on colour-ringed birds. After registering as a user, you can report the colour code you have seen and immediately receive data on where the bird has been ringed and observed before.

Project leader : Lista Ringing Group, Boks 171, 4558 Vanse, Norway.

e-mail: clifu@c2i.net

note 1: used codes for the pale-blue rings are: J601-J700.

note 2: used letters for the dark-blue rings are: A, C, G, E, H, J, K, L, M, N, P, R, S, T, U, V, X, Y, Z.

Orange ring with black code Cnnn or Cnnx (where n is a number and x a letter).

Ringing Centre, Finnish Museum of Natural History, Zoological Museum, P.O. Box 17, University of Helsinki, FIN-00014 Helsinki, Finland.

tel.: +358-9-191.28.847 or +358-9-191-28.848.

e-mail : elmu_ren@cc.helsinki.fi

website : <http://www.fmnh.helsinki.fi/birding>.

note 1: 700 rings were delivered in 2001-2004.

Orange ring with a 3 alpha-numeric code followed by "M" (on left leg) and metal ring (on right leg).

Kevin Scott, Manx Ringing Group, c/o Manx BirdLife, 35 New Road, Laxey, Isle of Man, IM4 7BG, British Isles, UK.

e-mail: kev@wm.im

website: www.manxringer.blogspot.com

note 1 : note the colon separating the 'M' from the first 3 digits.

note 2 : used codes are Z01:M through to Z99:M ; Y01:M through to Y99:M ; X01:M through to X99:M.

-

Orange ring with a black 4-digit code (on left tarsus) [letter, letter, number, T) and metal ring (on right tarsus) with as scheme site

Paul Roper, North Thames Gull Group.

e-mail : 123pr43@qenpbo.freemove.co.uk

note 1 : UNused codes are the letters E, I, O and Q and additionally, to avoid the remote possibility of any confusion with YLG in Sp

note 2 : example used codes : VA0T, VA1T, ... VD1T, VD2T ... VF1T, VF3T ...

note 3 : some codes are starting with the letter J.

-

Orange rings with black code "nnnH" [where n is number] (on right leg) and metal ring (on left leg).

Luka Jurinovic, Osjecka 3, HR-10410 Velika Gorica, Croatia.

e-mail : e-mail luka.jurinovic@gmail.com

or

Institute of Ornithology, Gunduliceva 24, HR-10000 Zagreb, Croatia.

e-mail : zso@hazu.hr

note 1 : these rings will be used for gulls wintering in Croatia, mainly on Zagreb rubbish dump.
Most rings are used on *Larus micahellis*, some on *cachinnans*), possible also some on *Larus argentatus*.

Orange ring with black code (mainly on right tibia).

Roland-Jan Buijs, Philips van Dorpstraat 49, NL-4698 RV Oud-Vossemeer, The Netherlands.

tel.: +31-(0)-166-61.73.70.

mobile : +31-(0) 6-18672392

e-mail: rjbuijs@hetnet.nl or r.buijs@rocwb.nl

website: <http://www.gull-research.org/>

note 3: rings are 1,8cm. in height and re placed above the knee (on the tibia) for better observation results in the colony (high vegetation) and on rubbish-dumps.

note 4: the position of the metal ring can be left tibia or left tarsus.

Orange (tall) ring with green / black code (4 numbers) on tarsus and BTO metal ring on other leg.

c/o Phil Bone, Food and Environment Research Agency (FERA), , Sand Hutton, York YO41 1LZ, United Kingdom.

e-mail : fera.gulls@gmail.com

note 1 : used numbers are from 0001 till 9999.

note 2 : birds may be colour dyed with either Rhodamine (pink/red) or picric acid (yellow) ; these sightings should be sent to Andy Baxter at andy.baxter@fera.qsi.gov.uk

Orange ring with black code KJxx or KJxxx(where x is number).

Risto Juvaste, Viljakaari 4, FIN-80510 Onttola, Finland.

tel.: +358-13-801.293.

gsm : +358-50-36.76.167.

e-mail : " rr <ADD> juvaste <DOT> fi "

website : www.juvaste.fi

note 1100 birds ringed in Russian Karelia, mostly without metal ring.

Large ring (37mm tall) (on right tarsus) with code (two letters, some with a colon or "+" between letters) and metal ring (on left leg).

Peter Rock, 7 Parkside Avenue, Winterbourne, Bristol BS36 1LU , United Kingdom.

e-mail: pete.rock@blueyonder.co.uk

note 1 : since 2009 a "+" sign is used.

note 2: colours change every year : [details below](#).

note 3: all birds ringed as pulli in urban colonies in SW Britain.

Ring with code (1 letter or number or 1,2,3 horizontal line).

C.J. Camphuysen, Koninklijk NIOZ, postbus 59, NL-1790 AB Den Burg, Texel, The Netherlands.

e-mail : camphuys@nioz.nl

note 1 : this is the former project of Arie Spaans.

Ring with code (1 letter or number or 1,2,3 horizontal line).

Hans-Ulrich Rösner, WWF-Wattenmeerstelle, Norderstrasse 22, 25813 Husum, Deutschland.

note 1: the project has been finished, sightings are -as always- welcome and will be answered.

note 2: the two rings (2.5cm high) on each leg are typical for this project.

note 3: the inscription on the blue, green, red and black rings is white, while the inscription on the yellow, orange and white rings black is.

note 4: there is a variation in the rings with horizontal lines. 1 horizontal line can be on top or in the middle. 2 horizontal lines can be on top, in the middle or 1 on top and 1 on bottom. The ringcode is as followed : 1 horizontal line is - , two horizontal lines is "F" and 3 horizontal lines are "3". Of course the letter F and the number 3 is not used in the combinations.

Red ring with white code (mainly on right tibia).

Roland-Jan Buijs, Philips van Dorpstraat 49, NL-4698 RV Oud-Vossemeer, The Netherlands.

tel.: +31-(0)-166-61.73.70.

mobile : +31-(0) 6-18672392

e-mail: rjbuijs@hetnet.nl or r.buijs@rocwb.nl

website: <http://www.gull-research.org/>

note 3: rings are 1,8cm. in height and re placed above the knee (on the tibia) for better observation results in the colony (high vegetation) and on rubbish-dumps.

note 4: the position of the metal ring can be left tibia or left tarsus.

Red ring (on left tarsus) with white code (3 or 4 letters) and metal ring (on right tarsus).

Landguard Bird Observatory, Mike Marsh, 7 Deben Way, Felixstowe, Suffolk IP11 2NS, United Kingdom.

e-mail: mike@imafxt.co.uk or mikecmarsh@tiscali.co.uk

note 1 : only letters are used on our rings, numbers are not used

note 2 : the following letters have not been used:- E, G, I, M, O, Q .

note 3: on the 4 letter codes there is a check spot between two of the letters

note 4: most rings are fitted so that the code reads from bottom upwards

Red ring with white code (Hxxx) and (Helgoland) metal ring (on other leg), allways "H" at beginning.

Dr. Sönke Martens, Carl Gördelerweg 16, D-25524 Itzehoe, Germany.

e-mail : S.Martens@KH-Itzehoe.de

note 1 : xxx stands for numbers and letters.

note 2 : examples are H99X, H123, HA67, HX43, H789, H23A

note 3 : rings are to be read from bottom to top, most rings have a "checkpoint".

note 4 : birds are ringed at Schleswig- Holstein.

note 6 : some rings are used at Lesser Black-backed Gulls, see this species.

note 3 : most rings are used on LBB Gulls, see this species.

Dark-red ring with code Cnnnx (where n is a number and x a letter).

Ringling Centre, Finnish Museum of Natural History, Zoological Museum, P.O. Box 17, University of Helsinki, FIN-00014 Helsinki, Finland.

tel.: +358-9-191.28.847 or +358-9-191-28.848.

e-mail : elmu_ren@cc.helsinki.fi

website : <http://www.fmnh.helsinki.fi/birding>.

note 1: 450 rings were used only during 1998 for fledglings for age identification studies. That colour shall not be in use anymore in Finland.

Red ring with white code.

Belarus Bird Ringing Centre. att. Tatiana Pavlushchick,

e-mail : bym.minsk@gmail.com

note 1: used codes are K701-800 (for 1999) ; K801-900 (for 2000) ; K901-000 (for 2001) ; KA01-00 (for 2002-03) ; KH01-00 (91 rings used in 2003) ; KE01-00 (only three rings were used in 2003) ; KE00-KE99 (are in use since 2005) and KN00-KN99 (since 2006).

note 2 : birds are ringed by Nikolai Yakovets.

Red ring (on right tarsus) with white code (letter P and 3 numbers).

Gdansk Ornithological Station, ul. Nadwislanska 108, 80-680 Gdansk 40, Poland.

tel./fax.: +48-58-308-07-59.

e-mail: pchyl@stronit.gda.pl

note 1: used code is: P001-P650.

White wingtags with black code (1, 2 or 3 symbols).Blue wingtags with white code (1, 2 or 3 symbols).

AG Möwen NRW, A. Buchheim, c/o Biol.Stat. Witten, Am Hang 2, D-58453 Witten, Germany.

e-mail: agmoewen@nawit.de

e-mail: abu.cachellis@web.de

note 1: identical code on each wing and the engraved code can be found out, still, even if both wingtags are seen incompletely (min. two symbols each tag).

note 2: note: most tags have -for the time being- three characters.

note 3: in Spain another project with white tags is running. No details are know yet.

note 4: among some 500 wing-tagged gulls some 20 are non-Herring gulls.

note 5: on the first of July '01 some 9000 readings of this project.

note 6 : 4 birds have been ringed in Central-Poland with a blue tags with a single white letter. (contact : Greg Neubauer, grechuta@stornit.gda.pl]

Pink dyed (on head).Red dyed (on nape).

Andy Baxter,

e-mail : a.baxter@csl.gov.uk

note 1: birds are marked by Central Science Lab on a landfill in Northumberland.

Information on the NW Gull Project of David Sowter.

Use of colour rings to study inter-colony movement and feeding/roosting sites of Lesser Black-backed Gulls at three sites in NW England.

The NW Gull project, which involves ringing and colour marking juvenile Lesser Black-backed Gulls at three large colonies, as well as a smaller number of adult and Herring gulls has now been running each year since 1997 with exception of 2001. A smaller number of gulls have also been ringed at roost or feeding sites. The project's aim is to look at the level of movement between colonies and the interaction between gulls at feeding/roosting sites as well as on migration.

The project started in 1997 with a pilot study using green rings with a white code letter for the colony ; R=Ribble, T=Tarnbrook

Fell , W=South Walney. Between 1998 and 2000 black rings with three yellow letters and one number were used. The initial letter indicates the colony and is the same as that used in 1997. There was no ringing in 2001 because of the restriction relating to Foot & Mouth Disease.

The project continued in 2002 and is to continue until at least 2005, though the number of gulls marked each year will be reduced. The colour rings used are of the same type as described above for 1998-2000. It is intended to analyse data based on sightings and reports from individuals, bird clubs and through national organisations like the BTO and the large gull coordinator Peter Rock.

Ribble Estuary National Nature Reserve (53°42'N/02°55'W).

In cooperation with Mike Gee/Dick Lambert, English Nature Wardens and SW Lancs Ringing Group, who have carried out some ringign for most years since the mid-1980's. The site within salt marsh near the mouth of the River Ribble and is subject to periodic flooding by high tides, which influences the level of the breeding success in some years.

Tarnbrook Fell, Forest of Bowland (54°01'N/02°35'W).

With permission and sponsorship from Grosvenor estates, Abbeystead and Mr. R. Banks, the Abbeystead Estate Manager, and Mr. I. Grindy of United Utilities for Brennanand estates. Dr John Coulson and associates had undertaken studies and control measures at this site since at least the mid 1980's. The colony is within heather, grass and peat-hag moorland at a height of 450-530 metres. It is here that culling and managed disturbance over a number of years has been used in an effort to improve the quality of the local water supply.

South Walney Nature Reserve (54°03'N/03°12'W)..

With permission of Cumbria Wildlife Trust and the warden(s) of the reserve. There has been ringing of gulls on this dune site at the south end of Walney island since at least the early 1960's. Theringing was continued led by Ian Spence and Rob Shaw through the 1980's and 1990's.

Colour rings used are :

1997 : Pale-Green showing white single letter code indicating the ringing site : R=Ribble , T=Tarnbrook , W=Walney.

1998-2005 : Black showing yellow 4-letter/number combination code with initial with the letter indicating the site as in 1997.

COLOUR-RINGS USED IN BRISTOL AND ELSEWHERE ON HERRING AND LESSER BLACK-BACKED GULL NESTLINGS SINCE 1980 WITH COHORT NAMES

YEAR	RING COLOUR	LETTER COLOUR	NOTE	COHORT NAME
1980	YELLOW	BLACK	-	YELLOW 1
1981	ORANGE	BLACK	-	ORANGE 1
1982	WHITE	BLACK	-	WHITE 1
1983	SKY BLUE	BLACK	-	SKY
